animal

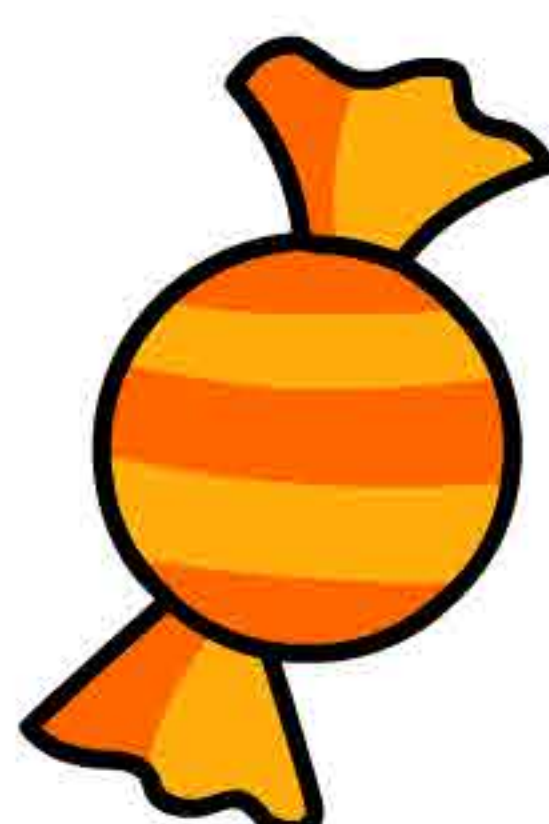

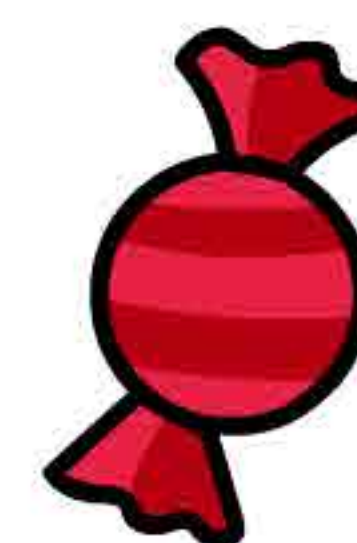

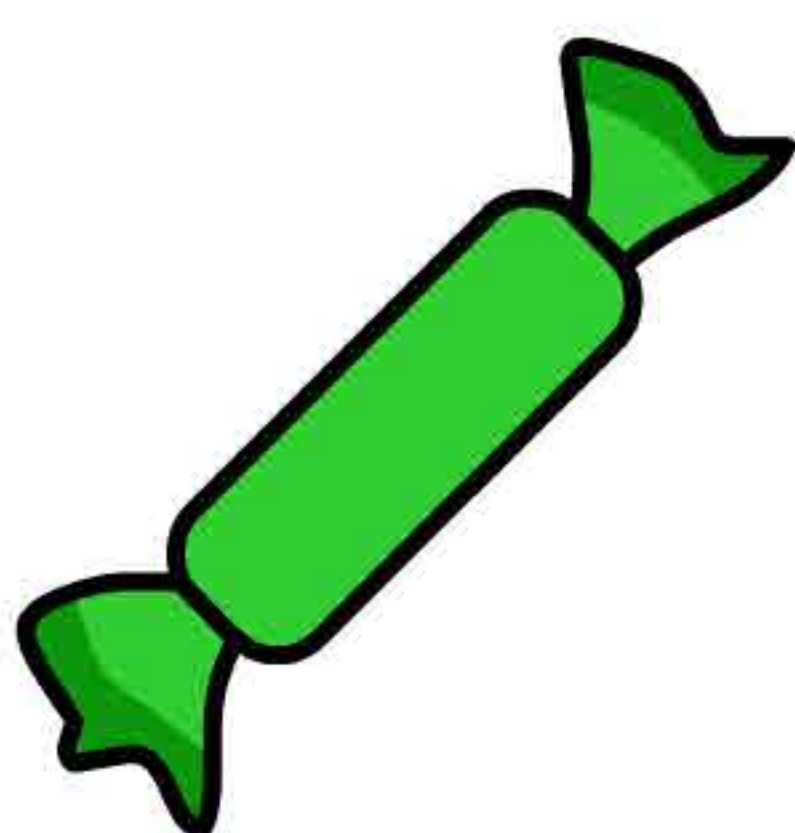

Circle the
Grey
Vehicle
that
cannot fly

Identify the pictures by given properties

Circle the
Red small
candy

Circle the
Sleepy
grey cat

Circle the
Big blue
house

Dear Parents & Teachers,

Many children with Autism Spectrum Disorder (ASD) find it difficult to learn basic concepts through the regular learning methods. We realized that it was essential to provide a unique way of learning which is designed just for their special needs. We came up with an educational program – AntiSpark, that focuses on the special needs of ASD. AntiSpark will ensure that kids with Autism get involved and grasp important concepts that they struggle with.

About the worksheets:

Children in the autism spectrum are mostly visual learners. Hence, we thought of creating special worksheets which will be an effective way for kids to learn.

These have been vetted and verified by special educators.

For more such worksheets, register yourself on www.antispark.com today.

About the app:

An exclusive app packed with well-researched games to support the goal of helping kids learn and understand at their own pace. It will offer a multitude of well-researched, engaging and interactive games carefully designed to suit the child's learning requirements. It includes concepts of picture association, understanding emotions, recognition of sounds and much more. AntiSpark app and content is verified and checked by special educators.

AntiSpark comes from the makers of KidloLand, a very popular kids learning app.
